ENVIRON MANAGEMENT

**UCEAP Quarter Units**

5.00

**UCEAP Semester Units**

3.30

## Course Description

The course introduces a range of key issues, concepts, principles and methods in environmental management. The major components, processes, and attributes to environmental management are also covered. The roles of civil society, market mechanism and government regulations in environmental management are examined. Real-life examples from Hong Kong, China, and overseas countries are discussed to illustrate how integrated approaches should be applied for identifying optimal options in environmental management decision-making processes.
