Course Description

This introductory course analyzes the elements have shaped identity and culture in Mexico throughout history, as well as the values that various artistic expressions developed over time. The course aims to:

1. Discover the historical development of the configuration of identities in Mexican culture, through the concepts of art, crafts, artist, craftsman, cutlure, folklore, acculturation and transculturation.
2. Distinguish artisan production and culinary culture and its connection with local and regional identities.
3. Distinguish particular processes of aesthetic production in visual culture, architecture and Mexican design in their historical context.
4. Explore the evolution of photography, film, and the media in Mexico, as well as its historical contribution to the development of gender, race and class identities.
