Course Description

This course focuses on the finance and macroeconomics of international financial flows. It covers the history of post-War financial arrangements, from Bretton Woods to the modern globalized financial system. Other topics covered include the determinants of the balance of payments, relationships between currency arrangements and capital flows and between trade and financial flows, the role played by capital inflows and outflows in financial crisis, the determinants and financing of foreign direct investment, the role of the IMF in the global economy and the case for a global tax on financial transactions.
