Course Description

This is an elective course on entomology. This course exposes students to general concepts of entomology and the biology of insects. It covers insect biology, anatomy, physiology, classification, behavior, ecology, plant-insect interactions, insect and human society, and methods in entomology. This course's teaching and learning activities include lectures, discussions, group projects, and a field visit. The course activities emphasize critical thinking skills, communication, and applying knowledge to real-world situations.
