DEVELOPMENTAL PSYCHOLOGY
Country Denmark
Host Institution University of Copenhagen
Program(s) University of Copenhagen
UCEAP Course Level Upper Division
UCEAP Subject Area(s) Psychology
UCEAP Course Number 107
UCEAP Course Suffix
UCEAP Official Title DEVELOPMENTAL PSYCHOLOGY
UCEAP Transcript Title DEVELOPMENTAL PSYCH
UCEAP Quarter Units 12.00
UCEAP Semester Units 8.00

Course Description

Developmental psychology is the scientific study of human development, covering periods from infancy through childhood to adolescence. A fundamental assumption in developmental psychology is that human development occurs within a specific environment and sociocultural context, profoundly influencing the individual child's developmental trajectory. The course provides an overview of the biological, cognitive, emotional, and social changes occurring during this period; introduces key theories and methods in developmental psychology; and presents quantitative and qualitative empirical research reflecting current international research within the field. A central theme explored throughout the course concerns how development is shaped by multiple levels of context – including genotype and neurobiology; social interactions with caregivers and peers; family, daycare and school environments, norms and culture, broader ecological conditions; and our species evolutionary history.

Language(s) of Instruction
English

Host Institution Course Number
