Course Description

This course introduces the basic concepts of statistics to systematically analyze the essential characteristics and interrelationships of economic data.

The main goal of this course is to understand statistical analysis of data and to apply to various issues using Excel. The topics include the basic concept of probability and statistics with the application of practical cases

Several Excel homework assignments will be assigned during the semester that will involve qualitative discussions and working through quantitative analyses and computations. Please be aware that to complete the homework, you will need to learn some Excel functions by yourself.
