APPAREL PRODUCTION TOTAL SYSTEM
Country Korea, South
Host Institution Yonsei University
Program(s) Yonsei University
UCEAP Course Level Upper Division
UCEAP Subject Area(s) Art Studio
UCEAP Course Number 102
UCEAP Course Suffix
UCEAP Official Title APPAREL PRODUCTION TOTAL SYSTEM
UCEAP Transcript Title APPAREL PRODUCTION
UCEAP Quarter Units 4.50
UCEAP Semester Units 3.00

Course Description

This course examines clothing development within the context of the apparel production process. Topics include performance criteria, cost and quality relationships, anthropometrics and sizing, garment fit, trims and findings, stitches and seams, structural treatments, and garment assembly. Students analyze how design features and construction details influence garment quality, functionality, and production outcomes. Course goals are to analyze and clearly communicate garment components in relation to product cost, quality, and performance; to demonstrate understanding of apparel manufacturing processes and terminology used in sewn product development; to evaluate stitches, seams, and construction methods in terms of production efficiency, cost, durability, and quality; to assess support materials, closures, threads, and trims based on their functions, characteristics, and impact on apparel quality and performance; and to understand the elements of good fit and indications of poor fit in RTW apparel.
