3.30

## Course Description

This course explores the relationship between the natural sciences, specifically their abiotic aspects, and geography. It discusses the fundamental concepts of astronomy, geology, geophysics, and hydrology, and their application to spatial studies. Topics include: the Earth's position and movements and their impact on the distribution of solar energy; characteristics and composition of solid materials exposed on Earth's surface-- minerals and rocks; dynamics and evolution of the lithosphere and its influence on the earth-- global tectonics and geological history; basic characteristics, composition, and general dynamics of the hydrosphere.

## Language(s) of Instruction

Spanish

## Host Institution Course Number

801716

## Host Institution Course Title

TERRITORIO Y SISTEMA NATURAL

## Host Institution Course Details

<https://geografiaehistoria.ucm.es/estudios/grado-geografiayordenaciondelterrito...>

## Host Institution Campus

MONCLOA

## Host Institution Faculty

Facultad de Geografía e Historia

## Host Institution Degree

GRADO EN GEOGRAFÍA Y ORDENACIÓN DEL TERRITORIO

## Host Institution Department

Departamento de Geografía

## Course Last Reviewed

2025-2026
