UCEAP Course Suffix
UCEAP Official Title CLIMATE CHANGE AND THE ENVIRONMENT
UCEAP Transcript Title CLIMATE CHANGE ENVR
UCEAP Quarter Units 5.00
UCEAP Semester Units 3.30

Course Description

This course examines climatic conditions on Earth and their interaction with the environment and human society. It focuses on climate change and deals sensibly with questions raised concerning future climatic conditions and evaluation of their impact on environment and society as essential to understand the nature of the climate system and what causes it to change. In particular, the impact of human activities on the climate system are set in perspective alongside the background of natural changes in the climate of our planet. Issues associated with societal decisions taken today and their potential impact on climate over the next century are also discussed.
