Lund University

UCEAP Course Level

Upper Division

UCEAP Subject Area(s)

Psychology

UCEAP Course Number

130

UCEAP Course Suffix

C

UCEAP Official Title

COGNITIVE NEUROSCIENCE: PROJECT WORK

UCEAP Transcript Title

COG NEUROPSY:PROJCT

UCEAP Quarter Units

4.00

UCEAP Semester Units

2.70

Course Description

Through theoretical studies and practical exercises, the course conveys knowledge about the structure and function of the brain and key areas of modern cognitive neuroscience, such as attention, memory, language, and cognitive control, as well as emotions and social interaction. The understanding of normal function is the primary focus of the course, but clinical examples are also used as they provide substantial illustrations of normal functioning. Furthermore, the course provides knowledge about relevant research methods within the area, and major emphasis is placed on the interdisciplinary nature of the subject. This module includes a literature review but can also consist of a short empirical oriented project (within the field of Cognitive Neuroscience).
