MOLECULAR NEUROPHARMACOLOGY

Country

United Kingdom - England

Host Institution

University of Sussex

Program(s)

University of Sussex

UCEAP Course Level

Upper Division

UCEAP Subject Area(s)

Biological Sciences

UCEAP Course Number

137

UCEAP Course Suffix**UCEAP Official Title**

MOLECULAR NEUROPHARMACOLOGY

UCEAP Transcript Title

MOLEC NEUROPHARMACL

UCEAP Quarter Units

6.00

UCEAP Semester Units

4.00

Course Description

In this course, students gain a molecular understanding of human health and disease, and how the mode of action of drugs is crucial for the development of new drugs with improved potency and reduced side effects. The course also underpins the development of personalized medicine. This is about giving the right treatment to the right people at the right time. It's also a move away from the "one size fits all" approach to the treatment of patients with a particular condition.
