Course Description

This introductory course fosters an evolutionary understanding of the human body, thought, emotion, behavior, society, and culture, and it is offered as a basic class open to students from any academic background.

“Evolution” is the key concept for scientifically investigating the characteristic patterns of human thought, emotion, and behavior, as well as sociocultural phenomena.

Drawing on intriguing findings from anthropology, cognitive neuroscience, evolutionary psychology, and behavioral ecology, we address a wide range of issues in individual lives and sociocultural contexts from an evolutionary perspective.

Topics include Evolutionary inquiries for humans, Foundations of evolutionary theory, Overview of human evolutionary history, Evolutionary approaches to mind and behavior, Sex and mating, Family and kinship, Group life and sociality, Culture and religion.
