ENVIRONMENTL ETHICS

**UCEAP Quarter Units**

4.00

## **UCEAP Semester Units**

2.70

### **Course Description**

How should we balance the need to produce cheap food with environmental damage? Should we be using low-cost airlines? Is it now immoral to have children? Should animals be granted the same rights as human beings? The climate crisis gives rise to many daily and long-term moral questions concerning how we should live and behave. This course introduces students to environmental ethics, the branch of philosophy concerned with how our moral values and decisions impact the natural world. Through a series of talks and discussions, this course grapples with the difficult environmental moral dilemmas we face as humans and encourage students to reflect and consider how we face these challenges.
