RESEARCHING ACADEMIC INTEGRITY IN AN ARTIFICIAL INTELLIGENCE
DRIVEN WORLD

UCEAP Transcript Title

ACADEMIC INTEGRITY/AI

UCEAP Quarter Units

5.00

UCEAP Semester Units

3.30

Course Description

In this course students explore how to conduct academic integrity research, considering topical areas such as what factors cause students to cheat, and how well university interventions to the misuse of generative AI work. The course also explores using AI to support the academic research process. It provides transferable research skills that can be used in other courses. The course is taught through a mixture of in-person, online, and prepared videos and resources. It also features guest presentations and discussion-based sessions, which are held periodically during the course. At the end of the course, students present their research as part of a group at an online external conference.
