UCEAP Semester Units

2.70

Course Description

This course examines eight broadly defined topics that delve into significant events and issues in the history of humanity, spanning from the Neolithic era to the present day. It will delve into pivotal historical milestones, including the birth of civilization, religious reform movements, the Industrial Revolution, the Columbian Exchange, the Black Death, the Great Depression, the World Wars, and more. Diverging from typical history courses that primarily focus on historical facts, this course seamlessly melds economics with history and history with economics.
