Course Description

The course provides students with a basic knowledge of key concepts of administrative law (public entity/body, administrative act/action, public contracts) and market regulation tools, taking into account the switch from a pure national model of market regulation to a mixed model of supranational public regulation. At the end of the course students are able to understand how market regulation affects the public/private relations and how public and private law instruments are used by to achieve policy goals. The course provides students with an in-depth understanding of the legal framework and principles governing global administrative law and market regulation. It describes the evolution of global administrative law and explains key concepts of administrative law, then focusing on the regulatory environment that influences market operations.

Supranational and international institutions, with a specific focus on the WTO, are examined and the relevance of market regulation in the relationship between private and public is discussed, is examined, and the relevance of market regulation in the relationship between private and public is discussed. Topics include: public body; administrative act/action; judicial review of administrative decisions; institutional structures focusing on the WTO and regulatory authorities; tariffs and customs regulations; antidumping, countervailing duties, subsidies; products safety regulations and environmental restrictions (SPS and TBT Agreements); TRIPS; labor standards and human rights; and exceptions art.
