Course Description

This course introduces experimental approaches to the study of language for students with a background in introductory linguistics. Students learn how linguistic hypotheses can be tested using behavioral methods such as acceptability judgments and reading-time measures. Through hands-on activities and a small-scale research project, they gain experience in designing experiments, analyzing data, and interpreting results in relation to current theoretical issues.

Required Prerequisites: Introduction to Linguistics I or II, or instructor consent.

Language(s) of Instruction

Japanese
