Course Description

This course examines the use of spreadsheets and databases for business management and analysis. It develops basic computer skills through the use of various features of Microsoft Excel such as Scenario Manager, Solver, Pivot Tables, and

Macros to solve complex business problems. It will also develop basic spreadsheet skills in Excel using basic functions, logic and reference functions, statistical functions, and charting to solve complex business problems. Moreover, it explores basic SQL (the most common database language) for business analytics.
